Introduction: About Redwood

Technology Powered
Human Driven
Logistics Integration

Redwood Logistics is a next-generation transportation provider; specializing in moving freight throughout North America, backed by our vast carrier network, our own fleet, spend management support, warehousing, distribution, and industry-leading technology.

We exist for one simple reason:

To Make Our Customers Great

We Make our Customers Great

Technology Powered
Human Driven
Logistics Integration

Redwood Logistics

We help shippers transform their supply chain by integrating and optimizing their systems, processes, and partners.

What it looks like to our customers

Technology Powered

Redwood Supply Chain Solutions

Technology Powered
Human Driven
Logistics Integration

We **make our customers great** by enabling them to focus on key priorities and business initiatives, not software or code.

Redwood Logistics simplifies the broad scope problem of modernizing your supply chain and strategically leveraging the cloud. The **RedwoodConnectSM** supply chain integration platform enables our **Knowledge Services** team to deploy best-in-class solutions with quality, flexibility and price predictability. We provide the expertise to make your supply chain digital transformation a zero friction initiative so all attention remains focused on your core business goals.

RedwoodConnectSM enables customer success by **quickly deploying powerful & innovative solutions for strategic business use-cases**, not by building infrastructure or writing code.

How we do it.

Our Products & Services

Technology Powered
Human Driven
Logistics Integration

Redwood **Knowledge Services** is the professional services arm of Redwood Logistics, where our technology and supply-chain experts work to design & deliver transformative solutions.

Redwood **Connect**SM enables low-friction B2B, A2A and B2BC via next-generation cloud solutions for large enterprises.

Redwood **Insight**SM provides analytical visibility to every piece of data that runs through our APIs with massively scalable cloud data warehouse and business intelligence solutions.

Redwood **GraphChain**SM combines blockchain technology with our proven connectivity and visibility solutions to help **FUTURE PROOF** our customers.
